Product

Swiss-Prot No.: P35240

Other Names: NF2 , MERL

Specificity and Sensitivity

Merlin (phospho-Ser518) antibody detects endogenous levels of Merlin only when phosphorylated at serine 518.

Source and Purification

The antiserum was produced against synthesized phosphopeptide derived from human Merlin around the phosphorylation site of serine 518 (R-L-SP-M-E).

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

Application Notes

Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows:

WB: 1:500~1:3000 ELISA: 1:4000
