Specificity and Sensitivity

n-NOS (Ab-852) antibody detects endogenous levels of total n-NOS protein.

Source and Purification

The antiserum was produced against synthesized non-phosphopeptide derived from human n-NOS around the phosphorylation site of serine 852 (F-N-S^p-V-S).

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

Application Notes

Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows:

WB: 1:500~1:3000 IF: 1:100~1:500 ELISA: 1:1000
